1/ June-May. Current year is preliminary. Previous year is preliminary through August of current year, estimated afterwards.

2/ Food imports and exports used to calculate total food use. Includes all categories of wheat flour, semolina, bulgur, and couscous and selected categories of pasta.

3/ Wheat prepared for food use by processes other than milling.

4/ Estimated food use equals wheat ground for flour plus food imports plus nonmilled food use minus food exports. See <http://www.ers.usda.gov/Briefing/Wheat/wheatfooduse.htm> for more information.

1/ June-May. Latest data may be preliminary or projected.

2/ Weighted average is the U.S. season-average price based on monthly prices weighted by monthly marketings. Prices do not include an allowance for loans outstanding and government purchases. For hard red winter, hard red spring, soft red winter, and white, simple average of monthly prices prior to 2002/03. Latest data for all wheat are from World Agricultural Supply and Demand Estimates.

3/ Prior to 1998/99, data were simple averages calculated by ERS for the all wheat prices in Kansas, Nebraska, Texas, Oklahoma, and Arkansas (major producers of hard red winter wheat). Subsequent data are national average prices for hard red winter wheat.

4/ Prior to 1998/99, referred to as other spring wheat.

5/ Prior to 1981/82, data were simple averages calculated by ERS for the all wheat prices in Ohio, Indiana, Illinois, and Missouri (major producers of soft red winter wheat). Subsequent data are national average prices for soft red winter wheat.

6/ Prior to 1981/82, data were simple averages calculated by ERS for the all wheat prices in Washington, Oregon, and Idaho (major producers of white wheat). Subsequent data are national average prices for white wheat.
